Education

Bachelor of Computer Science   **2021 - Present**

University of Buenos Aires

Experience

Freelance web developer   **Jan 2023 - Mar 2023**

Currently working on ServicioLibre web app:

- Collaborating with a team of three to develop a service application that connects consumers with service providers.
- Designing and improving key features to meet user needs.
- Ensuring scalability for future growth of the application.
- Resolving technical issues for a seamless user experience.

Web developer   **Jul 2022 - Oct 2022**

Responsibilities:

- Created an immersive virtual 360 tour with Three.js and WebGL.
- Enhanced user experience with interactive hotspots on tour.
- Created a tile-based system to optimize loading, resulting in over 80% reduction in first load time without compromising quality.
- Improved navigation and prevented low FPS by implementing a tile-based system that loads only the necessary tiles based on the user's position and movement.

Frontend developer   **Feb 2022 - Jun 2022**

Responsibilities:

- Developed and maintained user-friendly website for MaridajeClub sales platform.
- Implemented live video streaming system for product demos and informed purchasing.
- Collaborated with the backend team for efficient development and deployment of new features.
- Ensured visually appealing and easy-to-use platform for customers.
